PRERELEASE REV A

A mini Mausoleum – D.Roche 08/02/2023

To be made of 5mm Foamcore from dollar tree.

Top of the roof and shingles are left as an exercise to the reader, as well as wall textures. I don't have the 3d cad skills for those! ☺

This whole document should be printed (and scaled appropriately) to "Letter" size paper, rather than A4.

For plaques and decorations, check out the 3d printable objects from "scan the world" on myminifactory. I saw some lovely items from <https://www.myminfactory.com/es/users/Thorvaldsen>

A Lightburn file with all these cutouts are available when LED's are purchased from Terraintronics. STL's for the sconces are available there too.

Get the electronics to go
inside from
